

People, Politics, and Child Welfare in British Columbia

People, Politics, and Child Welfare in British Columbia traces the evolution of policies and programs intended to protect children in BC from neglect and abuse. Analyzing this evolution reveals that child protection policy and practice has reflected the priorities of politicians and public servants in power. With few exceptions, efforts to establish effective programs have focused on structural arrangements, staffing responsibilities, and rules to regulate the practice of child welfare workers. Contributors to this book conclude that these attempts have been unsuccessful thus far because they have failed to address the impact of poverty on clients. The need to respect the cultural traditions and values of First Nations clients has also been ignored. Effective services require recognizing and remedying poverty's impact, establishing community control over services, and developing a radically different approach to the day-to-day practice of child welfare workers. People, Politics, and Child Welfare in British Columbia provides a crucial assessment of the state of child welfare in the province. Practitioners, scholars, and students in social work, child and youth care, education, and other human-service professions will find this book particularly important.

That said, British Columbia's child-welfare system seems unique in these are the type of people the B.C. government has come to rely on to help address those needs and improve Indigenous child welfare across B.C.
