

A2 ICT: Workbook

Student workbooks will support your teaching and help your students skills and developments. The full-colour student workbooks each cover key topics in core subject areas to complement the main A2 courses in ICT. Each topic comprises: 1-2 pages of source material and 4-5 pages of related exercises designed to develop and test student skills, with space provided for written answers. The exercises take various forms, including exam-style questions (both short-answer and extended-answer), although the workbooks are not intended as mock exams. They are designed for systematic classroom use to support your own scheme of work or as the basis of a revision programme. Answers to the exercises are provided in an accompanying set of Teachers Notes. Where there is no objectively right answer, the notes identify the key points that should appear in the answer. Student workbooks are available only in class sets of 10. Each set of workbooks includes one FREE copy of the teachers notes. Single copy: ISBN 9780340982501 Pack of 10: ISBN 9780340948125

Range. A range is a group of selected cells which can be next to one another (adjacent) or non-adjacent. Ranges are identified by cell references e.g. A1:B6 or a spreadsheet cell. A cell is an individual box within a worksheet. Every cell on a worksheet can be identified by its unique cell reference e.g. H7, B14. Theory Notes Task. Students read the theory notes on the mini website and then answer the questions on the sheet. Task answers are supplied.
