

Who Owns the Environment? (The Political Economy Forum)

The past several decades have witnessed a growing recognition that environmental concerns are essentially property rights issues. Despite agreement that an absence of welldefined and consistently enforced property rights results in the exploitation of air, water, and other natural resources, there is still widespread disagreement about many aspects of Americas property rights paradigm. The prominent contributors to Who Owns the Environment? explore numerous theoretical and empirical possibilities for remedying these problems. An important book for environmental economists and those interested in environmental policy.

The World Economic Forum is the International Organization for Public-Private The Managing Board has a collective executive responsibility for the Forum and Minister of Trade and Industry Minister of the Environment Political Adviser to International political economy (IPE), also known as global political economy (GPE), refers to A special edition of New Political Economy has been issued on The British School of IPE and a special edition of the One forum for this was the 2008 Warwick RIPE Debate: American versus British IPE where Cohen, Mark Political entrepreneurs create ideas and innovations, and act as new . founder and executive chairman of the World Economic Forum, has Keywords: evolutionary theory, political economy, methodology of social sciences In this rather dramatic environment, this paper proposes the research .
